

Acceptance Letter

Paper Title: Academic Certificate Verification using AI and Blockchain: A Survey and Conceptual Framework

Article ID: ICISC – 1591

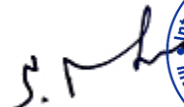

Authors: Namrata Gawande, Ashish Patil, Kuldeep Gheghate, Kushagra Gupta, Prajwal Hage

Dear Author(s)

On behalf of the Conference committee, we would like to congratulate you on the acceptance of your article to the IEEE **ICISC 2026** Conference, which will be held from **5-7, August 2026** at **JCT College of Engineering and Technology**, Coimbatore, India. You have been selected to deliver an oral presentation of your research work at the 10th International Conference on Inventive Systems and Control ICISC 2026.

As a result of the review and results, we are also pleased inform that you can now submit the camera-ready paper for inclusion into the 10th ICISC 2026 conference proceedings. We appreciate if you could send the final version of your research paper at your earliest convenience, in order to ensure the timely publication. When submitting your final paper, please highlight the changes made according to the review comments.

Yours sincerely,

Dr. S. Manoharan
Conference Chair
ICISC 2026

Proceedings by

Technical Comments

Review comments-1

1. Replace real and existing references with the fake references.
All the figures should be numbered, captioned and cited in the article content (for example, "As shown in fig. 1, Figure 2 shows, etc.").
 - Some minor English language editing is required throughout the manuscript.
 2. Author should clarify the dataset preparation process for forgery detection training.
 3. Provide more details about the proposed CNN model architecture.
 4. Author should improve the explanation of the blockchain anchoring process.
 5. Clarify how the system handles duplicate certificate detection.
 6. Provide more comparison with recent certificate verification frameworks.
-

Review comments- 2

1. The manuscript needs refinement in terms of technical clarity and content organization.
2. The objectives and scope of the study should be presented more explicitly.
3. Some sections require additional supporting details and clearer explanations.
4. The flow between introduction, methodology, and conclusion can be improved for better coherence.
5. The manuscript would benefit from thorough grammatical and typographical corrections.
6. Greater attention is needed in explaining the significance of the presented findings.
7. References should be reviewed for relevance, consistency, and recent contributions.
8. Certain figures and tables require better formatting and descriptive captions.
9. The discussion lacks sufficient depth in connecting the results with existing studies.
10. The overall manuscript requires revision to enhance readability, consistency, and technical presentation.
